

# SAM FEIGENBAUM

---

With twelve years experience in the field of architecture I have had the opportunity to work on a wide variety of projects and have experience in all phases of the architectural process. From the initial schematic design including preparing and giving presentations to clients in large and small groups, to full zoning and building code analysis to maximize the clients value on a project and through all stages of a projects development, including design development, construction drawings and construction administration. This experience has given me the ability to focus on the design phase of a project and enable the creation of a project that allows both the architect and client to be satisfied by the outcome.

## Experience

- Bienenfeld Architecture – March 2007 to present. Associate Principal August 09.  
High-rise condominiums, Synagogues and high end homes.
- SLCE Architects, New York, NY – March 2004 to March 2007  
Worked on projects in the fields of Healthcare, Housing and Religious Institutions.
